EXOR Marine Battery, with both start-up and deep cycle capabilities, is designed specifically for in-ship energy power with onboard power.

Specification:

| _ <u>.</u> | |
|---------------------------------|--|
| Constant voltage (V) | 12V |
| Constant capacity(20hr to10.5V) | 180Ah @25°C(77°F) |
| Dimensions | L506mm XW220mm X235mm |
| Weight | Approx 49.4Kg(108.81lbs) |
| CCA (-18°C/0°F) | 900A@ to 6.0V |
| CCA @25°C(77°F) | 1100A@25°C(77°F) |
| Idle capacity(25A,10.5V) | 410min @25°C(77°F) |
| Operation temperature | -20°C ~ 60°C(-22°F ~ 158°F) |
| Acceptable charging current | 0 ~ 54A |
| Recycle charging voltage | 14.5V~15.0V@25°C(77°F) |
| Self-discharge@25°C(77°F) | < 8%(Store for 90 days) |
| Case materials | High temperature resistant pp material |
| Type of terminal | Tapered terminal |

Product standard:

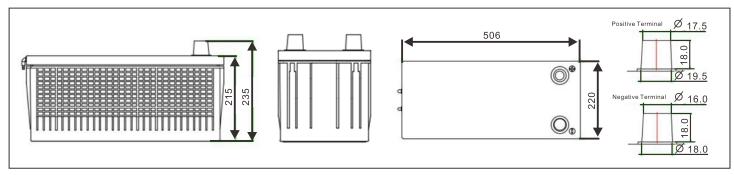

☑ EN 50342

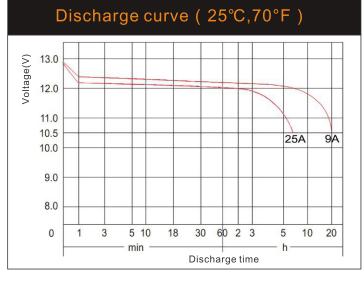

☑ VDA

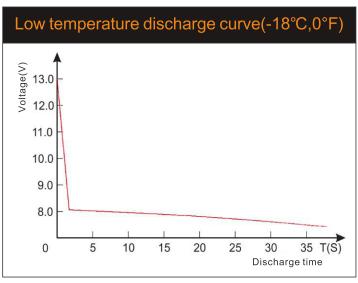

☑ GB/T5008.1-2013

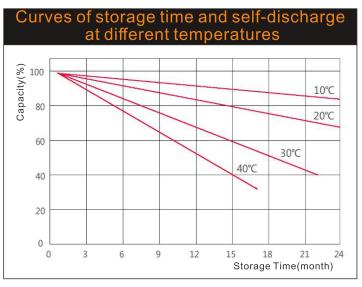

Product Features:

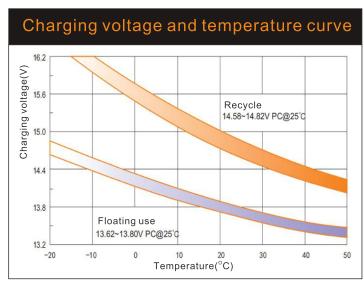

- > Earthquake-resistant, stable, high performance, maintenance-free design, durable, long-distance transportation without worry;
- > Stamping multiple lead calcium tin alloy plate grid, corrosion resistance, less water loss, extension the deep cycle life of the battery;
- ➤ Unique shell structure, no leakage of dumping, acid fog escape, explosion-proof, etc performance;
- Adopt high conductive lead alloy casting and welding, through the wall welding technology, high rate of starting discharge performance;
- ➤ Tight assembly pressure design structure: in the charging and discharging process of the battery, it can slow down the life attenuation caused by the high shedding of the positive plate expansion lead, and the battery life is longer

EXOR Marine Battery, with both start-up and deep cycle capabilities, is designed specifically for in-ship energy power with onboard power.

Specification:

| _ <u>.</u> | |
|---------------------------------|--|
| Constant voltage (V) | 12V |
| Constant capacity(20hr to10.5V) | 200Ah @25°C(77°F) |
| Dimensions | L506mm XW240mm X246mm |
| Weight | Approx 54.5Kg(120.15lbs) |
| CCA (-18°C/0°F) | 1000A@ to 6.0V |
| CCA @25°C(77°F) | 1230A@25°C(77°F) |
| Idle capacity(25A,10.5V) | 450min @25°C(77°F) |
| Operation temperature | -20°C ~ 60°C(-22°F ~ 158°F) |
| Acceptable charging current | 0 ~ 60A |
| Recycle charging voltage | 14.5V~15.0V@25°C(77°F) |
| Self-discharge@25°C(77°F) | < 8%(Store for 90 days) |
| Case materials | High temperature resistant pp material |
| Type of terminal | Tapered terminal(Left:negative;Right:positive) |
